WORK EXPERIENCE

Senior Software Engineer, Locaweb - *Nov/2014   - Apr/2018 -* São Paulo, SP, Brazil

→ Maintenance and development of new features for the platform provisioning system (the system that delivers the hosting machine for our clients).

→ Bug fixes in a distributed and polyglot environment with many levels of legacy code.

→ Fullstack development in the SSL management & automation team.

→ Technologies: Ruby, Rails, Sinatra, SqlServer, Mysql, Shellscript, UNIX, Git, Docker, code review, pair programming, test automation, Rspec, CI, TDD, Agile, Lean, Kanban.

→ More about Locaweb: https://www.youtube.com/watch?v=9nHGAfqcfJ0

Ruby Lead Developer, Verisoft - *Sep/2013 - Oct/2014 -Campinas,* SP, Brazil

→ Design and implementation of the RESTFull web services for mobile clients in a successful mobile platform that the sales team uses to empower communication, Vivotreinapp for Vivo (a big telecom carrier in Brazil).

→ Technologies: Rails 4, TDD, Heroku, Git, Postgresql, Ruby, RESTfull, webservice, Rspec, shellscript, test automation, Scrum.

→ More about Verisoft: http://verisoft.com.br/en/

Previous Experiences

→ REST API and frontend development for social network for cars enthusiasts. (Ruby, Rails, Git, Rspec, TDD, Heroku, Mongo)

→ REST API for mobile subscription content delivery app with a lot of automated tests. (Ruby, Rails, Git, Cucumber, Capybara, Rspec, TDD, CSS, JS, webservices)
→ Sole developer at a startup project of a crowdfunding platform for concerts and artistic events, from the ground up. Here I dealt with payment gateway integration, Facebook integration, tight deadlines and a fair share of client side javascript. (Ruby, Rails, Git, CSS, JS, payment gateways)
